Furneaux Freight have today entered into an agreement with Qube Ports for the future stevedore arrangements of the Lady Barron Port. This arrangement is scheduled to remain in place for a period of 60 days at which time it will be evaluated and a long-term solution adopted.

Furneaux Freight have received overwhelming support from the local community on Flinders Island and remain dedicated to providing a cost efficient and reliable service to both Cape Barren and Flinders Island.

Furneaux Freight are keen to work with Qube Ports in establishing a safe working environment at the Lady Barron Port which is currently unobtainable given the substandard redevelopment of the Port Area.
